4. First Aid Measures

Description of first aid measures:

General information: There is no need of specific precaution. Only the melted material can be considered as hazardous. Burn risk with the melted material.

Inhalation	Move to fresh air. Consult a doctor if complaint persists.
Skin contact	Wash with soap or liquid paraffin.
Eye contact	Wash with plenty of running water.
Ingestion	In the unlikely event of ingestion, consult a doctor.

Most important symptoms and effects, both acute and delayed:

Skin: Rash, Urticaria

Indication of any immediate medical attention and special treatment needed:

See section: Description of first aid measures

5. FireFighting Measures

Extinguishing media:

Suitable extinguishing media:	Foam, fire extinguishing powders, carbon dioxide. For the not-burst product losses and discharges, water spray can be used to waste inflammable vapours and protect all the people working to stop the loss.
Extinguishing media which must not be used for safety reasons:	Water jets must not be used. Water is not effective to extinguish fire, but it can be used to cool the closed drums which are exposed to fire. This is necessary to prevent explosions.
Special hazards arising from the substance or mixture:	Toxic gases can be released in case of fire.
Advice for fire-fighters:	Wear self-contained breathing apparatus. Wear protective equipment.

6. Accidental Release Measures

Personal precautions, protective equipment and emergency procedures:
Wear protective equipment. Avoid contact with skin and eyes. Keep unprotected people away.
Environmental precautions:
Do not release into the environment. Do not empty into drains, surface water, ground water. Inform authorities in the event of product spillage to water courses or sewage systems.
Methods and material for containment and cleaning up:
Allow to solidify. Remove mechanically. Dispose of contaminated material as waste according to Section 13.
Reference to other sections:
See advice in section 8.

7. Handling and Storage

Precautions for safe handling	
Hygiene measures:	Wash hands before work breaks and after finishing work. Do not eat, drink, or smoke while working.
Instructions in case of fire or explosion:	No special measures are required.
Conditions for safe storage, including any incompatibilities :	
Technical measures and store conditions:	Ensure good ventilation/suction.
Specific end use(s):	
	Hot melt adhesive mixture.

Biological Exposure Indices: None

Exposure Controls:

Instructions for technical plants configuration:
Ensure a good ventilation/suction.
Respiratory protection:
In case of dust formation, we recommend wearing of appropriate respiratory protection equipment with particle filter P. This recommendation should be matched to local conditions.
Hand protection:
Wear refractive gloves category III (ref. Reg. EN374). For the glove's material it's necessary to consider: compatibility, degradation, time-to-break and permeation. In case of mixture, the gloves durability to chemical agents must be checked before their use since it is not predictable. The glove's consumption depends on their use durability and way.

Exposure Controls/Personal Protection continued

Skin protection:
Wear protective equipment with long sleeves and safety shoes for professional use of I category (ref. Reg. 89/686/EEC and EN ISO 20344). Rinse with water and soap after having removed the protective clothes.
Eye protection:
Goggles that can be tightly sealed (ref. Reg. EN 166).
Environmental exposure controls:
The emissions coming from manufacturing processes, including those from ventilation devices, should be checked in order to comply with the regulations on environmental protection.
